25X1

a. Armor-piercing artillery missiles are manufactured in Yugoslavia which can penetrate heavier armor than that currently being used in the manufacture of tanks. Manufacture of these missiles started two years ago in the factories of Kraljevo.

b. Experimental radio-controlled "flying discs" were tested in the Belgrade area in September 1953. The tests were fully successful and these "flying discs" are now being manufactured. They are capable of attaining an altitude of from two to three kilometers. These "flying discs" are steel-covered, can rise quickly and can be directed toward aircraft which would be destroyed upon contact.

c. Atomic energy has been developed in Yugoslavia to a point where that country can be considered fourth or fifth in progress made in atomic energy research.

2. The information about the "flying discs" was apparently thought to be exaggerated 25X1
